Vigilan Adds Medication Management to CARE Suite for Senior Living Management

Partnership Med Management Technology increases accuracy and efficiency leading to higher quality care

PORTLAND, Ore., April 28, 2009 — Vigilant, the leader in software for better senior living, announced today its partnership with Med Management Technology to integrate its QuickMAR medication management system into Vigilant's CARE Suite for assisted living, independent living, and dementia care communities. By adding QuickMAR to Vigilant's product suite, assisted living care providers can manage the resident's daily living care plan with greater accuracy while saving time in administering medications to each resident.

“By harnessing the power of technology to improve medication management, assisted living and dementia care communities can reduce the risk of error and simplify medication administration, record keeping, and reordering,” said Reed DeMordaunt, CEO of Med Management Technology. “Integrating our MAR with Vigilant's CARE Suite gives both residents and their families a streamlined delivery system that focuses on care and accuracy.”

QuickMAR safeguards against medication errors by providing active reminders and alerts to caregivers that automate the timely delivery of the correct medications to care residents. Vigilant customers can seamlessly add QuickMar to their current operational software suite to streamline medication management into any care plan, resident assessment, and billing process.

“During our recent customer survey over half of our customers said adding medication management was one of the most important things we could do. We are listening and we

more

are pleased to find a partner that can help our customers save time and improve the quality of the care delivered,” said Doug Fullaway, president and COO of Vigilant. “With an electronic MAR, care providers can eliminate the error-prone task of flipping through page after page of medication instructions. The system pinpoints exactly what needs to be done for each resident and effectively alerts the care provider with reminders for accuracy. The system can also generate a recap of the data in a presentable format for care conferences, doctor visits, or review by nurses.”

About Med Management Technology

Med Management Technology (MMT) was formed in 2007 by an experienced management team from the long-term care industry and the software industry. MMT provides proven technology solutions that improve the quality of service and reduce operational costs for long term care (LTC) providers, their clients, and the pharmacies that serve them. The company is privately funded. For more information, please visit www.quickmar.com.

QuickMAR Information

QuickMAR is an electronic medication administration record, or e-MAR, for use in a long-term care setting, such as assisted living homes or skilled nursing facilities. But QuickMAR is more than just an electronic MAR:

- Shorter Med Passes
- Bar-code scanning of medication
- Quick and accurate recording of a med pass
- Auto-Alerts for PRN follow up
- Touch screen navigation
- Easily generate med reports to meet state regulatory reporting requirements.

For more information, visit www.quickmar.com or call (888) 340-9866.

About Vigilant

Vigilan is a leading operational management systems company for independent living, assisted living and dementia care providers who need an easier way to improve the quality of care and to profitably manage their business. Unlike other systems providers, Vigilant offers an adaptive system that can accommodate the variety of state regulations and individual facility requirements. Core to the company's operational excellence suite of products is the Administrator that, on average, increases revenue by \$150 per resident per month.
