

Vigilan Care Suite Now Compatible with Apple iPad

Award-winning operational management software available on new mobile device for service at the point of care; Integration with Curotek adds mobile care tracking and charting

PHOENIX—May 25, 2010—Vigilan, provider of software for better senior living, announced today that its Care Suite software for assisted living, independent living and dementia care communities is now compatible with the new Apple iPad™. [Vigilan's CARE suite](#) includes a complete technology package to manage resident care, communication, staffing, marketing, medication management, billing, training and education tracking, and interfaces to the most popular accounting systems. For the first time, nurses, administrators and owners can take the complete application with them to the point of care to balance resident care requirements, staff competency, resource management, state compliance and resident satisfaction. Vigilant Care Suite on the Apple iPad will be demonstrated at the [Assisted Living Federation of America](#) (ALFA) conference in Phoenix May 25-26 in booth 617.

“Assisted Living management is a highly mobile activity,” said Doug Fullaway, president and COO of Vigilant. “Making Vigilant Care Suite available on the Apple iPad will allow our customers to capture information at the point of interaction and make immediate recommendations. We think the iPad is a transformative device for our industry that will allow resident care to happen in real time that is both friendly and barrier-free.”

Vigilan for iPad can be used by nursing staff to conduct pre-move-in assessments, by marketing staff while they are prospecting for new residents, and by managers who want to see a complete view of their communities at any point in time.

Vigilan and Curotek Marry Comprehensive Care Plan with Mobile Task System

[Curotek](#), the leader in Elder location, nurse call integration to care management kiosks, sensor systems for preventing falls and elopement and document management, will join Vigilant at ALFA to demonstrate their combined applications on the Apple iPad. Curotek has created a multi-function mobile application. The task application pulls information from the Vigilant service plan and creates a task list for care providers. Using the iPad, this combined solution closes the loop on the service

plan, eliminates additional data entry and provides an accurate, up-to-date record of services provided to residents for nursing staff, administrators and families.

Additionally, the Curotek application for iPad delivers alerts from Curotek's sensor systems directly through the iPad. Caregivers using the application can check the location of residents, receive alerts when residents move toward exit doors and get out of bed. Caregivers can also create progress notes and review details of care plans from the iPad, all without leaving the resident.

Pricing and Availability

Vigilan Care Suite for iPad is available now at no additional charge for Vigilant customers. Vigilant will provide initial start-up assistance as well as ongoing service and support. Vigilant Care Suite for iPad is only available for customers who have a license for the Vigilant Care Suite application.

About Vigilant

Vigilant is the leading operational management systems company for independent living, assisted living and dementia care providers who need an easier way to improve quality of care while profitably managing their business. Unlike other systems providers, Vigilant offers an adaptive system that can accommodate the variety of state regulations and individual facility requirements. Core to the company's operational excellence suite of products is the Administrator that, on average, increases revenue by \$150 per resident per month.
